

THORAYA RABEA

Front-End Developer | React.js | Next.js | TypeScript

Nasr City, Cairo, Egypt | 01152394747 | thorayarabea@gmail.com

[linkedin.com/in/thoraya-rabea](https://www.linkedin.com/in/thoraya-rabea) | github.com/ThorayaRabea | my-portfolio-4kjp.vercel.app

PROFESSIONAL SUMMARY

Front-End Developer with a B.Eng. in Communications & Electronics Engineering, building responsive, scalable, and pixel-accurate web applications with React.js, Next.js 14, and TypeScript. Experienced in translating Figma designs into production-ready interfaces, integrating REST APIs, managing server state with TanStack Query, and managing global state with Redux Toolkit. Delivered API-driven products with authentication, admin dashboards, and CRUD workflows, deployed on Vercel. Combines a strong foundation in OOP, data structures, and algorithms with a focus on clean, maintainable code and a polished user experience.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, C++

Frameworks & UI: React.js, Next.js 14, Vite, React Router, Redux Toolkit, Context API, Tailwind CSS, Material UI (MUI), Bootstrap, Flowbite, shadcn/ui

Data & Forms: REST API Integration, Axios, TanStack Query (React Query), Formik, Yup, React Hook Form, Zod

Tools: Git, GitHub, Vercel, Figma (Dev Mode / MCP), npm, ESLint / oxlint

Core Competencies: Responsive Web Design, Authentication & Authorization (JWT), State Management, Reusable Component Architecture, Performance Optimization, Cross-Browser Compatibility, Figma-to-Code Workflow, UI/UX Implementation, Agile Collaboration

CS Fundamentals: OOP, Data Structures, Algorithms, CCNA Networking Basics

PROJECTS

Exam App - Online Examination Platform | *React 19, TypeScript, Vite, Tailwind CSS 4, TanStack Query, React Router, React Hook Form, Zod, Axios*

Live Demo: exam-app-three-liart.vercel.app | **GitHub:** github.com/ThorayaRabea/exam-app

- Built a full exam platform for a bootcamp with two experiences: a student portal and a dedicated admin dashboard, both connected to a live REST API.
- Implemented complete authentication: multi-step registration with OTP email verification, login, forgot/reset password, JWT-based session handling, and route guards for protected pages.
- Developed the student exam flow: infinite-scroll browsing of diplomas and exams, question-by-question exam with a countdown timer and auto-submit on timeout, and a results page with a score chart and per-question answer review.
- Built the admin dashboard with paginated, searchable, filterable, and sortable data tables and full CRUD for diplomas (including image upload), plus management of exams, questions, and audit logs.
- Structured the codebase by feature modules with typed API layers, query-key factories, and schema-first form validation (React Hook Form + Zod); built a reusable UI kit on accessible Base UI primitives; deployed on Vercel with SPA routing configuration.

E-Commerce Admin Dashboard | *Next.js 14, TypeScript, Redux Toolkit, MUI, REST API*

Live Demo: ecommerce-dashboard-eight-sandy.vercel.app | **GitHub:** github.com/ThorayaRabea/ecommerce-dashboard

- Translated a Figma design system into a pixel-accurate, fully responsive admin dashboard using Next.js 14 and Material UI.
- Built dynamic data visualizations (sales, revenue, and customer analytics charts) with real-time filtering and interactive stat cards.
- Implemented product, customer, and order management modules with CRUD operations integrated with a live REST API.
- Managed complex global state with Redux Toolkit, including async data fetching, caching, and optimistic UI updates.
- Designed a role-based access structure (Admin Role, Control Authority) and a reusable component architecture for scalability.

Social Media Application | *Next.js 14, TypeScript, Redux Toolkit, MUI, Axios, Formik*

Live Demo: social-media-nextjs-blond.vercel.app

- Built a full-featured social platform with authentication (Sign Up / Sign In), profile management with photo upload, and password change.
- Implemented post CRUD (Create, Update, Delete) with Likes, Shares, and Comments interactions.

- Engineered a social graph with Follow/Unfollow and Follow Suggestions using Redux Toolkit for global state.
- Integrated Formik for form handling and Axios for API communication, with end-to-end type safety using TypeScript.

E-Commerce Platform | *React.js, Context API, Axios, TanStack Query, Formik, Yup*

Live Demo: ecommerce-react-app-coral.vercel.app | **GitHub:** github.com/ThorayaRabea/ecommerce-react-app

- Architected a responsive React.js e-commerce app with dynamic routing, custom hooks, and Context API-based cart and authentication state.
- Built form validation with Formik and Yup, using smart button states (dirty/isValid) for better UX.
- Integrated Axios and TanStack Query for efficient server state management and automatic data synchronization.

Weather Application | *Vanilla JavaScript, HTML5, CSS3, OpenWeather API*

Live Demo: weather-gamma-six-85.vercel.app

- Developed a real-time weather app that fetches and renders dynamic data from the OpenWeather API.

Games Collection (Memory Game & Tic-Tac-Toe) | *Vanilla JavaScript, DOM Manipulation*

Live Demo: games-two-nu.vercel.app

- Built interactive browser games focused on core JavaScript logic, event handling, and DOM manipulation.

Bank System | *C++, OOP, Data Structures, Algorithms*

- Designed a secure banking system applying OOP principles, linked data structures, and algorithmic problem-solving.

EDUCATION

B.Eng. in Communications & Electronics Engineering

2017 - 2022

Al-Azhar University, Cairo, Egypt

- Graduation Project: Data Center Network Simulation with firewall protection against Layer 2 attacks (VLAN hopping, MAC flooding).

COURSES & CERTIFICATIONS

- React.js - Route Academy, 2024
- Front-End Development Level 1 - NTI (National Telecom Institute), 2023
- Software Engineering Diploma - Route Academy, 2022 - 2023
- CCNA (Cisco Certified Network Associate) - Cisco, 2021 - 2022

LANGUAGES

Arabic: Native | **English:** Professional Working Proficiency (Upper-Intermediate)
